

Gursimran Singh

Cybersecurity Analyst | CompTIA Security+ | SOC / Blue Team

Ludhiana, Punjab, India | +91 9814933353 | gursimrann.singh12@gmail.com

LinkedIn: linkedin.com/in/gurs1mrans1ngh | GitHub: github.com/gsimransingh | TryHackMe: tryhackme.com/p/gursimransingh

PROFESSIONAL SUMMARY

CompTIA Security+ certified Cybersecurity Analyst focused on SOC operations, phishing analysis, and threat detection. Builds defensive tooling (PhishGuard, Shuri), runs a SOC home lab with Splunk, Sysmon, and Wazuh, and has completed 365+ hands-on blue-team labs. Currently in an IT and ERP role that reinforces asset management, networking, and Windows Server administration fundamentals alongside core security work.

TECHNICAL SKILLS

Security Operations: Incident response, alert triage, threat detection, threat hunting, log analysis, SIEM, SOC operations, malware analysis, DFIR, phishing analysis, AI security

Tools & Platforms: Splunk, ELK Stack, Wazuh, Sysmon, MS Defender, Wireshark, TShark, tcpdump, Brim, Nmap, VirusTotal, AbuseIPDB, CyberChef, Autopsy, CAPE

Scripting & Frameworks: Python, Bash, PowerShell, SQL, MITRE ATT&CK, NIST CSF, Cyber Kill Chain, CTI

Network & Infrastructure: TCP/IP, DNS, HTTP, IDS/IPS, EDR, SOAR, SPF/DKIM/DMARC, vulnerability assessment, Active Directory, Windows Server

Offensive Security: VAPT, OWASP, Metasploit, Burp Suite, Kali Linux, reconnaissance, enumeration, web pentesting

PROFESSIONAL EXPERIENCE

IT & ERP Executive

Sep 2026 – Present

Ecoston India Private Limited, Ludhiana

- Administer Domain Controller and Windows Server 2025 operations, including regular backups and troubleshooting unresponsive or slow servers.
- Manage IT assets across the organization (smartphones, IP phones, monitors, printers, routers, switches, cameras, LAN cabling) with labeling and tracking for inventory accountability.
- Provision SIMs and handsets, configure speed dials, and resolve end-user issues (PC failures, printer disconnects, network connectivity).
- Administer Odoo ERP for inventory operations: purchase orders, physical-to-virtual inventory reconciliation, new item/vendor creation, requisitions, and internal transfers.
- Manage organizational data, files, and folder structures.

Independent SOC Skills Development

Nov 2025 – Present

Self-directed, Remote

- Built a home lab simulating an enterprise network, forwarding Windows Event logs and Sysmon data to a centralized SIEM for log and phishing analysis.
- Developed 25+ custom Splunk searches and dashboards to detect anomalous behavior, brute-force login attempts, and unauthorized privilege escalation.
- Completed 365+ blue-team and SOC-focused labs on TryHackMe covering threat hunting, incident response, memory forensics, malware analysis, and log analysis.

Cybersecurity Intern

Sep 2025 – Oct 2025

InLighnX Global Private Limited, Bengaluru

- Developed Python security tools for host discovery, service enumeration, and network analysis.
- Built a PDF encryption CLI utility using pypdf with a password-protected workflow.
- Created a Scapy-based ARP scanner to map networks and collect IP/MAC data.
- Designed a multithreaded TCP port scanner with banner grabbing and CSV reporting.

PROJECTS

PhishGuard — Python phishing triage CLI for SOC analysts github.com/gsimransingh/PhishGuard

- Automates Tier 1 phishing triage: parses .eml files (headers, Reply-To chain, body URLs, attachment metadata) and extracts IOCs.
- Validates SPF, DKIM, and DMARC from headers and live DNS lookups; detects display-link mismatches and typosquatting.
- Enriches IPs and URLs via AbuseIPDB and VirusTotal (opt-in) and applies explainable, weighted risk scoring (LOW to CRITICAL).
- Exports text, JSON, HTML, CEF, and CSV reports for SIEM ingestion; supports batch triage.

Shuri — Windows workstation diagnostics CLI github.com/gsimransingh/shuri

- Portable first-response toolkit that checks CPU, memory, disk, drive health, network, battery, services, updates, and Microsoft Defender in one scan.
- Transparent health scoring (100 minus shown deductions), history tracking with comparison of past assessments, and JSON/HTML/Markdown reports with a --redact option.
- Concurrent scanning and a standalone Windows .exe build; Python, Typer, Rich, psutil.

Wazuh SOC Monitoring Lab — Wazuh, SIEM, Windows, Linux

- Built a SOC environment for centralized log collection, endpoint monitoring, and threat detection.
- Investigated Windows/Linux security events to identify indicators of compromise, practicing alert triage and MITRE ATT&CK-based analysis.

Network Traffic Analysis Lab — Wireshark, TShark, Brim, Nmap

- Analyzed PCAP files and live traffic to identify suspicious connections, protocols, and IOCs.
- Performed reconnaissance and service enumeration with Nmap and packet-level investigation with Wireshark, TShark, and Brim.

EDUCATION

Bachelor of Computer Applications (BCA), Guru Nanak Institute of Management & Technology, Ludhiana Graduated 2024

CERTIFICATIONS & TRAINING

- **CompTIA Security+ (SY0-701)**, CompTIA, Jul 2025
- **SOC Level 1**, TryHackMe Learning Path, Jul 2026
- **AI Security**, TryHackMe Learning Path, May 2026
- **Google Cybersecurity Professional Certificate**, Google / Coursera, 2023
- **Cyber Security Expert Program**, Simplilearn, 2023
- **Cybersecurity One-Year Diploma**, Craw Security, 2024
- **Certified Ethical Hacker (CEH v12)**, Training completed
